

Fracture risk assessment: From Basics to Baffling

PRESENTED BY:

William Leslie, MD MSc FRCPC
Professor of Medicine and
Radiology at the
University of Manitoba

Thursday, Oct 25, 2018

12:00-1:00pm (Eastern Time)

This webinar will be of particular interest to FLS medical leads, FLS coordinators and clinicians managing osteoporosis patients

Determining fracture risk is an important measure in the prevention of secondary fractures. In this webinar, Dr. Leslie will discuss and describe:

- How and why fracture risk assessment has changed over the past decade
- Recent advances in fracture risk assessment that enhance quality in patient care
